WORK EXPERIENCE

Project 1:

Project Title: Gifts & Entertainment

Organization: Wells Fargo

Team Size: 8

Business Description: Various government agencies and Self-Regulated organizations have created regulation around the gifting and entertaining of employees of others and government officials to which Wells Fargo must adhere. In order to remain compliant, WFS spends amount of time tracking, reporting, and monitoring gift and entertainment expenses.

Technology Corner: Used **Python** programming and **Django** for the backend development and **React**, **Webpack**, **Redux**, and **ES6** for front-end and **PostgreSQL** for database. Worked on **Django ORM** module for signing complex queries. Used **Django Migrations** for designing and expanding of the database.

Project 2:

Project Title: Actimize application

Organization: Wells Fargo

Team Size: 6

Business Description: Actimize application is used to maintain the Threshold values for the surveillance of products and to create alert whenever any frauds detected during trades. It's a Web Application where developers have to create/update the DB tables and develop UI for Lists which includes/excludes the trade value which helps in detecting frauds. Since, there are 32 models in Product Surveillance I have worked on 6 models.

Technology Corner: Developed entire front-end and backend modules using **Python** on **Django** Web Framework. Designed and developed the UI of the Website using **HTML**, **CSS** and **JavaScript**. **PyCharm** as the main tool and **GitHub** as our repository is being used.

Project 3:

Project Title: Master Data Governance

Organization: SAP Labs India

Role: Automation Test Engineer

Business Description: Master Data Governance (MDG) is used to centrally create, change and distribute master data. In this there are six module Business partner, Customer, Supplier, Material, Finance and Custom objects. In this I worked on Business Partner, Customer, Supplier and Material.

Technology Corner: Converted ABAP code to **Java**. Used eCATT and **Eclipse** as the main tool, and **GitHub** as our repository.
